1 and iPhone .2 and also gives you the password that can be used to unlock iPhone .3 iOS and Apple have announced that new iPhone models are coming in 2019 and this will be their first year for the 12th anniversary of iOS . The iPhone .1 was launched in the year 2007 and was Apple's first iPhone model. After 3 years, in 2010, the iPhone .2 was launched and was the first iPhone with a dual-core Apple A5 chip. The third year was the iPhone .3 and this was the first iPhone model with Touch ID. In the following years we got the iPhone .4, 5, 6, 7, 8 and iPhone .9. The iPhone .10 was launched in the year 2016 and this was Apple's second year for the 12th anniversary of iOS . In addition to the launch of the iPhone .10, Apple has released the iPhone Xs and Xs Max for the year 2017 and the iPhone .11 was also launched for the year 2018. If you don't know how to unlock iPhone .1 to iPhone .10 then here are the simple steps. 1. Firstly, you need to go to the settings of the iPhone .1 and then tap on your name, after that tap on Passcode and then tap on Lock Pattern to set the pattern of your choice. 2. Follow the instructions to reset the phone by tapping on Restart and then tap on Erase All Content and Settings. 3. After the reset is done, your iPhone .1 can be unlocked to iPhone .10. The iPhone .1 will ask you to tap on your name again, then tap on your email and then tap on Allow. This completes the unlock. iOS 11 is the most advanced version of iOS yet, and it includes a bevy of new features, including the ability to run apps on your iPhone even if you are on a mobile data plan, among other things. Unlock your iPhone 7 with Pass codes and iCloud Unlock Unlock your iPhone 7 with Pass codes and iCloud Unlock. iPhone 7 is one of the best smartphone in the year 2016 and Apple's latest iPhone model. The iPhone 7 features a True Tone display that changes color to adapt to the light and dark of the ambient environment. The iPhone 7 also offers Face ID and a slightly improved iPhone 7 Plus. Now you can unlock your iPhone
