Do not cheat or copy in any way the Crack.Q: can not get array result from looping array in php i am creating a progress meter for my website and currently have problems with showing the result from my looping. I want the result to be displayed into a table(table1), but when I run my code it displays only "0" instead of the result, please help. Here is the code for my table: A; you are overwriting Stable1 array in every loop Stable1 = array(); ^|1 but you are using: Stable1[] = \$i; ^ should be: Stable1[] = \$i; ^ Or use: Stable1[\$i] = \$i; ^ A: Look at your array declaration. It's an empty array initially which gets filled by the index, i.e. table1[1], table1[2]... Your code looks like it's doing table1[0] table1[1] table1[2] ... table1[4] (Note 2d92ce491b
