For the those who have used the early versions of touch2pc, the new version has been completely re-written from the ground up. This will allow the program to be more scalable to meet any future requirements and the customer base will be better served. You will find that the new version has been more stable, runs faster and more reliable. 11/02/2006 - Please note that the App Help menu has been removed. All help functions are in the included help file. 10/02/2006 - Please note that there are now

What's New In?

Touch2Pc is an excellent Touchpad printer emulation software that has been developed specifically to work with the TouchPad and install the TouchPad Printer driver through Windows. Once installed, it will recognize the TouchPad and run automatically whenever a print job is sent. Touch2Pc has been designed in such a way to ease installation on any Windows XP, Vista or Windows 7 platform. Touch2Pc Printer Highlights: There is no need to mess with any special settings, or to make any modification to the system; just use the Touch2Pc Printer and send the job to your printer. A new TouchPad is detected and the Touch2Pc Printer driver is installed automatically on your Windows system. The Touch2Pc Printer driver automatically starts the Windows TouchPad printer and saves the job. The printer automatically prints your job whenever you send it to the TouchPad. Download Touch2Pc Printer Installer & Software Advertisements Touch2Pc Printer Features: Automatic print job extraction from Windows touchpad, supports the HP Touchpad and PDC2250.
